Installation Guide for the Case Manager App

Prerequisites for Installation

Before starting, make sure you have the following:

1. **Compatible Device**:

   o **Android Devices**:

     ▪ **Version**: Android 6.0 (Marshmallow) and above.

     ▪ **Hardware**: Smartphones and tablets, including Samsung Galaxy, Google Pixel, and Amazon Fire tablets.

   o **Firestick and Google TV**:

     ▪ Compatible with select TV models for testing on larger screens.

2. **Free Storage Space**: Ensure your device has at least **100 MB** of free storage.

3. **Internet Connection**:

   o Required to download the APK file.

   o Needed for features like syncing with the USTDA server (TDAMIS++).

4. **File Management App**: If your device doesn't have a file manager, install one (e.g., **Files by Google**).

5. **Permissions**:

   o You may need to allow app installations from unknown sources.

   o Ensure that your device's **NFC**, **Microphone**, and **Camera** are enabled for specific features.

Compatible Devices

The Case Manager app is compatible with the following devices:

- **Smartphones**:

  o Samsung Galaxy series (S7 and newer).

  o Google Pixel series (Pixel 2 and newer).

- Any Android device running **Android 9.0 or higher**.

- **Tablets**:

  - Samsung Galaxy Tab series.

  - Amazon Fire Tablets (HD 8 and above).

Installation Instructions

Follow each step carefully to install the Case Manager app on your Android device.

Step 1: Download the App APK

1. **Click the Download Link:**

   - [Case Manager APK](#).

2. **Navigate to the Download Page:**

   - This link will open a Google Drive page. You will see a preview or an option to download the file.

3. **Download the APK File:**

   - Click the **Download** button on the top right corner of the screen.

   - If prompted with a warning about the file type, click **Download Anyway**. This is a standard warning for APK files.

Step 2: Transfer the APK to Your Mobile Device

You have a few options to get the APK onto your Android device:

- **Option 1: USB Transfer**

  1. Connect your Android device to your computer using a USB cable.

  2. Copy the downloaded APK file from your computer.

  3. Paste it into the **Download** folder on your phone.

- **Option 2: Email or Cloud Transfer**

  1. Email the APK file to yourself or upload it to a cloud storage service like Google Drive.

  2. Open the email or cloud storage app on your device.

3. Download the APK file onto your phone.

Step 3: Enable App Installation from Unknown Sources

1. **Go to Settings** on your Android device.

2. Tap on **Security** or **Privacy** (this may vary depending on your device).

3. Look for **Install Unknown Apps** or **Install from Unknown Sources**.

4. Enable the setting for the app you will use to install the APK (e.g., **Chrome** if downloaded through a browser or **File Manager** if using a file explorer).

Step 4: Install the APK on Your Device

1. Open the **File Manager** or **Downloads** folder on your phone.

2. Locate the APK file (it may be named something like case_manager.apk).

3. Tap the APK file to begin the installation process.

4. If prompted, tap **Install**. You might see a security warning. Choose **Install Anyway** or **Allow** if necessary.

5. Wait for the installation to complete. Once done, you should see an option to **Open** the app.

Step 5: Open and Run the App

1. Go to your home screen or app drawer.

2. Look for the newly installed **Case Manager** app.

3. Tap the app icon to open it.

4. Follow the on-screen instructions to set up and start using the app.
